Scala base

Scalabase is a conference for developers in the early stages of their Scala journey

Scalabase Slides

Want to make your slides look extra sharp at Scalabase? While use of these is optional, we've prepared three basic templates with the branding of ScalaCon that you are invited to use for your talk. The platforms we have to offer templates for are:

Reveal.js

This is the base template for reveal.js that you can use in your talk.

Google Slides

This is the base template for Google Slides that you can use in your talk.

Keynote

This is the base template for Keynote that you can use in your talk.

Fonts

- **Raleway** for headlines. Download from Google Fonts
- **Open Sans** for paragraphs, lists, tables. Download from Google Fonts
- **Fira Code** for code. Download from Google Fonts

Colors

- Background: #0D1D31
- Color Primary: #DE3423

Resources

- **Carbon:** Code formatting
- **Unsplash:** Free images
- **Font Awesome:** Free icons
